Thomas Burke Invites American Students for Visit in England

By HENRY L. FARRELL.
(United Press Staff Correspondent.)
New York (By Mail).—It will be several years before Sir Thomas Lipton gets another chance for America's Cup—if he wants one.

Recent activities of the titled tea king in England indicate that he has not given up the ambition of his life to own the fastest yacht in the world, and that he may challenge the New York Yacht Club for another race next summer.

In a period when money is not just the lowest thing on the market, a million dollar yacht race is not the best thing to get back to normalcy, and for that reason the New York Yacht Club probably will discourage any attempt for another race next year, according to opinion prevalent here.

The yacht club speaks officially and it announces it cannot discuss a challenge until it has been received, but, nevertheless, prominent members of the club have expressed the individual opinion that the cup will be kept on the shelf for at least two more years.

Lipton is said to be considering plans

now for another addition to the Shamrock family of challenges. When he failed in his million-dollar venture to beat the Resolute last summer and win the cup, it was thought that he would be through. But he is persistent.

Two of his Shamrocks are now high and dry at Jacob's shipyard, City Island. They will remain there, however, it is believed, and a new Shamrock will be built and sailed over to compete in the next race.

For the same reason that an America Cup race is not probable in 1922, it is logical to believe that King Albert's Cup race across the Atlantic will not be on the 1922 program.

Attempts to stage the race this summer from Sandy Hook to Ostend, received a polite and courteous frown from American yachtsmen, who took the stand that the race would cost too much money and the investment of such big sums in a pure sporting event would not tend to bring the country back to its feet.

Fill your Fountain Pen with Stafford's Ink and forget it.

No fussing with your fountain pen when it's loaded with brilliant Stafford's Fountain Pen Ink.

A uniform, steady flow always on tap.

It never sticks, gums or clogs the pen-point or barrel.

The secret is in the chemical formula which has made Stafford's famous as

"The Ink That Absorbs Moisture From the Air."

Your fountain pen is a delicately adjusted instrument. Most inks are too heavy, too syrupy to flow smoothly through the point escapement. Stafford's Fountain Pen Ink is made for just that particular purpose. Most every stationer sells it.
